Mannan Masud

Professional Summary

Software Engineering student at the University of Sahiwal, skilled in Python, C++, and OOP. I build real-world solutions — from AI-powered attendance systems to voice assistants — and am actively growing my freelancing practice. Eager to contribute through internships and open-source collaboration.

Skills

Python • C++ • OOP • OpenCV • DeepFace • NumPy • Pandas • Tkinter • HTML • CSS • Speech Recognition • Excel • Data Entry • Freelancing • Prompt Engineering • Critical Thinking • Fast Learner • Team Player • Problem Solving

Education

Certifications

• Claude 101 — Anthropic

• AI Fluency: Frameworks & Foundation — Anthropic

• AI for Business Professionals — HP LIFE

• Generative AI: Prompt Engineering — Coursera

• Foundation of Cyber Security — Google

• Plan a Successful Freelancing Business — CalArts

• Python for Data Science & AI — IBM

• Excel Skills for Business — Macquarie Univ.

• Intro to Front-End Development — Meta/Coursera

Projects

Face Recognition Attendance System

AI-powered multi-face recognition system using a webcam to detect students in real time and log attendance automatically to CSV files. Features a Tkinter GUI with live camera feed and attendance dashboard. Demonstrates practical computer vision and automation skills.

Jarvis — Python Voice Assistant

Wake-word activated voice assistant that listens for "Jarvis" and executes spoken commands — opening websites, playing music, and responding via text-to-speech. Built to deepen understanding of event-driven programming and Python's speech/audio ecosystem.

Ornamental Garden Materials Calculator

Python CLI tool that computes plant count, soil volume, and fill material requirements based on user-supplied garden dimensions and plant spacing. A practical freelancing-aligned utility project.

Achievements

• Honihar Scholarship Recipient — awarded for academic excellence

• 3.88 CGPA — Top Performer in 1st semester, University of Sahiwal

• 9+ Certifications — from Anthropic, IBM, Google, Coursera & more

• Open Source Projects — Face Recognition System & Voice Assistant on GitHub
